

Modern Slavery Statement

2026

Introduction

Brookfield Corporation is a leading global investment firm focused on building long-term wealth for institutions and individuals around the world. Brookfield Corporation has one of the largest global pools of discretionary capital, which is invested across three main businesses: Asset Management, Wealth Solutions, and its Operating Businesses including infrastructure, energy, private equity, and real estate.

Brookfield Asset Management Ltd. (“**Brookfield Asset Management**”) is a leading global alternative asset manager, headquartered in New York, with over \$1 trillion of assets under management across infrastructure, energy, private equity, real estate and credit, offering a broad range of investment strategies designed to build and preserve wealth for institutional and individual investors. It invests on behalf of pension plans, endowments and foundations, sovereign wealth funds, financial institutions, insurance companies and private wealth investors worldwide for the long term.

At the center of our success is the Brookfield Ecosystem, which is based on the fundamental principle that each group within Brookfield benefits from being part of the broader organization. Together, Brookfield Corporation and Brookfield Asset Management benefit from the Brookfield Ecosystem – the collective intelligence and insights we gain through our operational expertise, global reach and deep relationships with partners around the world. This ecosystem powers its ability to uncover the most compelling investment opportunities, make better-informed decisions, and deliver strong risk-adjusted returns across market cycles.

This Statement has been prepared by each of Brookfield Corporation, Brookfield Asset Management, the United Kingdom Reporting Entities and the Australian Reporting Entities (together, the “**Reporting Entities**”) which are set out in Appendix I. In this Statement, references to “we”, “us” or “our” refer to the Reporting Entities. Brookfield Corporation controls various operating companies that operate in diverse industries and regions, and in accordance with their own policies and practices, directly and through the **Business Group Reporting Entities** set out in Appendix II. To the extent that the operating companies have reporting obligations, they will report independently from Brookfield Corporation and will be identified in the applicable Business Group Reporting Entity’s Statement or, if controlled directly by Brookfield Corporation, set out in Appendix II as **Directly Controlled Operating Reporting Entities**.

The United Kingdom Modern Slavery Act 2015 (“**MSA UK**”), The Commonwealth Modern Slavery Act 2018 (“**MSA Australia**”) and The Fighting Against Forced Labour and Child Labour in Supply Chains Act (“**MSA Canada**”) require certain entities (i) based, or operating, in the United Kingdom or Australia and exceeding specified revenue thresholds set out in the MSA UK or MSA Australia or (ii) listed on a stock exchange in Canada, or having a place of business in Canada, doing business in Canada, or having assets in Canada and exceeding specified size thresholds set out in the MSA Canada, to set out the steps taken to identify, assess and mitigate (and, in the case of the MSA Canada, to set out the steps taken to prevent and reduce) the risks of modern slavery and human trafficking in their business and supply chains. This Statement is made in accordance with the MSA UK, MSA Australia and the MSA Canada and relates to the period from January 1, 2025 to December 31, 2025 (the “Reporting Period”). It will be the tenth statement for the United Kingdom Reporting Entities under the MSA UK, the sixth statement for the Australian Reporting Entities under the MSA Australia and the third statement for Brookfield Corporation and Brookfield Asset Management under the MSA Canada.

During the Reporting Period, the United Kingdom Reporting Entities, the Australian Reporting Entities, the Business Group Reporting Entities and the Directly Controlled Operating Reporting Entities were subsidiaries of (or entities engaged in reportable activities under the MSA Canada which are controlled by) Brookfield Corporation.

Services provided by the Reporting Entities include:

- asset management;
- advisory services;
- group holding entities and related activities; and
- corporate services.

Commitment

The Reporting Entities strive to embed sustainability practices throughout our business, underpinning our goal of fostering a positive work environment and having a positive impact on the environment and the communities in which we operate. Through our engagement with sustainability frameworks and organizations, we continue to evolve our sustainability reporting and protocols to align with leading practices. Brookfield Corporation is a signatory to the Principles for Responsible Investment (“PRI”) and completes the PRI assessment annually, reinforcing our longstanding commitment to responsible investment and sustainability practices. The United Kingdom Reporting Entities and Australian Reporting Entities, as subsidiaries of Brookfield Corporation, align with the principles of the PRI.

We are committed to conducting our business in an ethical and responsible manner, including by carrying out our activities in a manner that respects fundamental human rights and supports the prevention of human rights violations within our business, including but not limited to:

1. operating with robust health and safety practices to support the goal of zero serious safety incidents;
2. striving to ensure that the interests, safety and well-being of the communities in which we operate are integrated into our business decisions;
3. where applicable, expecting our vendors to respect human rights and maintain processes aimed at identifying and preventing adverse human rights impacts that could arise from their or their suppliers’ operations; and
4. acting in ways aimed at:
 - a. the elimination of discrimination in employment;
 - b. the prohibition of child and forced labor; and
 - c. the eradication of harassment and physical or mental abuse in the workplace.

Our commitment to conducting business in an ethical and responsible manner is not only the right thing to do, but also fundamental to creating long-term value and mitigating significant reputational risk. We are cognizant that the risks of human rights violations, modern slavery and human trafficking are complex and evolving, and we will continue to work on addressing these risks in our business. Our approach and processes are reviewed at least periodically and, where appropriate, updated as necessary to reflect changes in circumstances and practice.

How This Statement Was Prepared

The Reporting Entities continue to manage the preparation of the modern slavery statement through a working group comprised of representatives of its business groups and members of its regional teams (“**Working Group**”).

The Working Group coordinates the development and implementation of the Reporting Entities’ modern slavery approach and works to properly integrate this approach with the Reporting Entities’ core business activities, including contracts, due diligence processes, training and communications, as appropriate. The Working Group has developed this framework through collaborative consultation with relevant internal stakeholders and, where appropriate, external advisors to verify that our policies and processes meet applicable legal requirements. This Statement and the related policies and procedures are reviewed at least annually and maintained in line with the business environment in which the Reporting Entities’ operations are conducted. Ongoing consultation also takes place through various forums such as management meetings, board and committee meetings and periodic reviews associated with the risks of each business within scope.

The Statement was reviewed by members of the respective leadership teams before being formally approved by the relevant boards of directors.

Summary of Key Activities in 2025

Modern Slavery Working Group

Our dedicated Working Group has continued its efforts to assess the implications of the relevant legislation and prepare our processes, systems and controls to ensure compliance. The Working Group comprises representatives from the regulatory and legal teams in the UK, Australia and Canada (together, the “**Regulatory Teams**”), as well as representatives from each business group (the “**BG Contacts**”) who maintain direct contact with our portfolio companies. Through training sessions and resource sharing, the Regulatory Teams have supported a coordinated reporting approach across our business, reinforcing our commitment to ethical business practices and minimizing the risk of modern slavery within our business and supply chain.

Global Human Rights & Modern Slavery Policy

During 2025, we continued to enhance our modern slavery program by updating and consolidating the Human Rights and Modern Slavery policies of Brookfield Corporation and Brookfield Asset Management into a single, global firm-wide policy. This unified policy reflects our ongoing commitment to respecting fundamental human rights and sets out a consistent approach to identifying and addressing human rights violations across our business and supply chain. The updated framework supports greater alignment and clarity across the organization as we continue to evolve our governance practices over time.

Modern Slavery Sub-Category Under The Whistleblowing Hotline

We enhanced our reporting framework by adding a designated modern slavery sub-category to the ethics violation classifications of our whistleblowing hotline. This addition ensures that any allegations or concerns related to modern slavery are distinctly flagged, thereby improving visibility and enabling a more targeted response to potential violations.

Vendor Screening

We streamlined the vendor screening process for our UK operations to support a more consistent and efficient approach to vendor onboarding and oversight. Vendors are screened through third-party due diligence platforms and are expected to meet, the ethics and compliance commitments set out in Brookfield’s Vendor Code of Conduct, taking into account the nature, scope, and risk profile of the engagement. Where appropriate based on risk, vendors are also expected to have appropriate policies and procedures in place to uphold these commitments within their own operations and supply chains, including respecting human rights and maintaining processes to identify and prevent adverse human rights impacts.

Our Business Activities

Assessing Modern Slavery Risk

Our approach to addressing modern slavery is designed to be commensurate with the risks we face, which vary based on several factors, including jurisdiction, industry and sector.

Modern Slavery Risk Profile

1. THIRD-PARTY VENDORS

Given the nature of our business and the geographic locations in which we operate, third-party suppliers and vendors used across the Reporting Entities' businesses generally fall under the below categories:

Outsourcers

Where a business activity or professional service is outsourced to another organisation.

Vendor Software Providers

This includes off-the-shelf software, that is hosted in Brookfield data centers, including hardware vendors used to facilitate business processes.

Cloud/Hosted IT Services

Encompasses a range of IT services provided in various formats.

Data Providers

Organizations that provide data which feed into our systems or terminals that provide access to market data.

Professional Services

Includes consulting, legal, human resources, accounting, training, tax, audit, banking and education.

Property and Facilities Maintenance

Includes building repairs and maintenance, cleaning, security and utilities, and public services.

Hotels and Lodging

Travel, including accommodation, is generally booked through a Brookfield approved travel management company.

ENGAGING WITH OUR VENDORS

The Reporting Entities continuously strive for excellence in our contracting practices, believing that well-compensated and trained workers, operating under fair working conditions, deliver high-quality products and services. Brookfield utilizes indices and resources, as appropriate and in Brookfield's discretion, as a basis to identify countries or other factors that may have a higher risk of human rights and modern slavery violations. We believe that the risk of modern slavery within the majority of our third-party vendors is low. This assessment is based on the jurisdiction, and the regulated industries, in which they operate and the skill of the professionals providing such services. However, we acknowledge that, to a lesser extent, we engage with suppliers who may be considered higher risk in terms of modern slavery. These may include suppliers of office stationery and cleaning and catering services. We recognize that each of our suppliers has its own supply chain, and our vendor assessments consider this risk where appropriate and possible. We currently have limited visibility of these extended supply chains, excluding projects where subcontractors or materials require our approval.

2. EMPLOYEES

Our people are our most important asset. The majority of the Reporting Entities' employees are employed in the UK, Australia, Canada or the US and are professional and administrative staff. The Reporting Entities have human resources policies, procedures and processes in place designed to protect against modern slavery and human trafficking in the Reporting Entities' employee population, including the Human Rights and Anti-Modern Slavery Policy (discussed further below). These include:

- employment conditions;
- processes for reporting and resolving staff concerns and grievances;
- non-discriminatory hiring practices;
- employment screening (including work eligibility checks); and
- appropriate workplace behavior.

Through our global Positive Work Environment Policy, all directors, officers and employees have a duty to ensure a safe and respectful workplace environment where high value is placed on integrity, fairness and respect. They are required to refrain from, identify and report workplace discrimination, violence and harassment as it occurs. The Reporting Entities' employees receive training on the global Positive Work Environment Policy and are required to certify annually that they have read and complied with it.

Based on the above, we consider that there is a low risk of modern slavery within the employee population of the Reporting Entities.

3. BUSINESS OPERATIONS – INVESTMENTS

As part of investment due diligence, we seek to assess sustainability-related risks and opportunities and factor them into the overall investment decision. This includes leveraging leading industry guidance to identify sustainability factors most likely to materially impact the financial condition or operating performance of companies in a sector. As part of our Sustainability Due Diligence Protocol, we provide specific guidance to investment teams on assessing bribery and corruption, cybersecurity, health and safety, human rights, modern slavery and climate-related risks. We also have specific processes aimed at identifying human rights violations and modern slavery as part of due diligence for new investments, which include risk assessments, mitigation, training and governance. Investment teams are required to maintain records of assessed risks and, where appropriate, we perform deeper due diligence, working with internal experts and third-party consultants as needed. Where appropriate, these processes give consideration to the Organization for Economic Co-operation and Development ("OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights as part of our due diligence process and ongoing management.

An example of the type of work we encourage in our portfolio companies to combat modern slavery is set out below:

RESPECTING HUMAN RIGHTS

Respecting human rights is fundamental to Brookfield Energy's business and is integrated throughout its decision-making, governance and operations.

Progress within the Organization

In 2025, Brookfield Energy continued to progress its oversight by refreshing its human rights risk assessment and confirming its salient human rights areas in line with its growing business. It also continued to advance implementation efforts and deliver training to build awareness and capability, while integrating human rights into its internal audit program to assess alignment with its policies and programs¹

Managing Human Rights Risks in the Supply Chain

Internally, Brookfield Energy's global Sustainable Supply Chain Working Group, comprising procurement and sustainability professionals from its operating businesses, shares best practices, monitors performance, and identifies opportunities to enhance supply chain sustainability, including human rights.

Externally, Brookfield Energy engages with suppliers and collaborates with industry associations to advance transparency and traceability. For example, as members of SolarPower Europe, Brookfield Energy participates in the Solar Stewardship Initiative, which promotes responsible sourcing and improved supply chain traceability within the solar sector. In parallel, Brookfield Energy reinforces these industry-wide efforts through direct supplier engagement in areas of elevated risk. In the solar supply chain, where human rights considerations are at the forefront of its priorities, it negotiates framework agreements with key suppliers that embed robust human rights expectations and standards. This approach enables it to promote transparency, apply consistent requirements at scale, and drive consistent standards across its portfolio.

Brookfield Energy regularly reviews and refines its approach in response to stakeholder engagement and evolving risk landscapes.

1. Including the United Nations Universal Declaration of Human Rights, International Bill of Human Rights, and the International Labor Organization's Declaration on Fundamental Principles and Rights at Work.

Management of Modern Slavery Risks

1. GOVERNANCE

We recognize that strong governance is essential to sustainable business operations, and we aim to conduct our business according to the highest ethical and legal standards. We are committed to policies aimed at maintaining a workplace free of discrimination, violence and harassment, and we expect our staff to act in a way which promotes a positive work environment. Our approach to addressing modern slavery is designed to be commensurate with the risks we face which vary based on several factors including jurisdiction, industry and sector. Key supporting policies and guidelines (together, the “**Policy Framework**”) include, but are not limited to:

Human Rights and Anti-Modern Slavery Policy

This policy aims to codify our approach to respecting fundamental human rights and our efforts to identify, prevent and mitigate human rights violations within our business and supply chain.

Code of Business Conduct and Ethics

The Reporting Entities’ Code sets out the expected conduct of our directors, officers and employees in relation to honesty, integrity and compliance with legal and regulatory requirements. Employees, directors, officers and any temporary workers who are subject to the Reporting Entities’ Code are required to certify annually that they have read and complied with the Code and the policies and protocols incorporated therein.

Whistleblowing Policy

The Reporting Entities are committed to conducting business with honesty and integrity and staff are expected to maintain high standards. This Policy clearly sets out the expectations of reporting and responsibilities, and outlines whistleblowing procedures addressing how to raise a concern, confidentiality, as well as remediation, external disclosures and our zero tolerance for retaliation or malicious acts.

Vendor Management Procedures

In connection with any vendor engagement, employees are required to comply with the Reporting Entities’ policies and procedures, including those in relation to anti-modern slavery.

We expect providers of goods or services to Brookfield to adhere in all material respects to ethics and compliance commitments similar to those set out in our Vendor Code of Conduct (“Vendor Code”), and to the extent applicable, to have the necessary policies and procedures in place to support such commitments within their business and supply chain. Our Vendor Code sets out our expectations of vendors that provide goods or services to the Reporting Entities and, where appropriate, vendor contracts include acceptance of the Vendor Code or reference to equivalent vendor policies.

The Reporting Entities’ approach to addressing high-risk, third-party vendors includes conducting enhanced due diligence checks, the use of specific contract clauses in legal agreements, requiring vendors to provide their modern slavery statement and evidence modern slavery mitigation strategies.

Sustainability Due Diligence Protocol

As part of our Sustainability Due Diligence Protocol, we provide specific guidance to investment teams on assessing bribery and corruption, cybersecurity, health and safety, human rights, modern slavery and climate-related risks. Where warranted, we perform deeper due diligence, working with internal and third-party experts as appropriate.

Financial Crime Policies

These include our anti-bribery and corruption, and anti-money laundering programs that are designed to prevent financial crime and the movement of money derived from crime (including crimes relating to modern slavery).

Modern slavery and financial crime are closely linked, as proceeds from modern slavery and human trafficking need to be 'cleaned' before entering the mainstream economy. Therefore, preventing the onboarding of those involved in financial crime, identifying suspicious or criminal activity and making reports to the relevant authorities not only supports the fight against money laundering, but also, by association, the fight against modern slavery.

Positive Work Environment Policy

This outlines our commitment to providing a workplace free of discrimination, violence and harassment and summarizes the responsibilities of employees, directors, officers and any temporary workers to which the policy applies to understand: (i) what constitutes workplace discrimination, violence and harassment; (ii) their obligations to maintain an environment where these behaviors are not tolerated; and (iii) how to report incidents following proper procedures.

Our Policy Framework is reviewed periodically and updated as necessary.

2. TRAINING

We place importance on creating a culture that promotes high standards of ethical behavior as well as the protection of human rights. We continue to raise awareness and commit to providing human rights training, which includes the topic of modern slavery, to new employees who participate in our investment advisory business and those in high-risk roles as part of the onboarding process, with ongoing training provided, as necessary. Additional training relevant to applicable regions and role, particularly in higher-risk functions such as procurement is provided. Where appropriate, we encourage our portfolio companies to organize training on a variety of sustainability matters for relevant staff.

3. RISK ASSESSMENT

Risk assessments are important to the Reporting Entities' efforts to identify and prevent human rights violations within our business and supply chain. The modern slavery risk for each of the Reporting Entities varies based on the nature of its business operations. Our risk-based approach enables the Reporting Entities to focus efforts where most required.

4. REMEDIATION

We have not found any evidence of forced labour or child labour. Where possible, we will try to use our leverage to address any issues that we discover.

5. WHISTLEBLOWING HOTLINE

The Reporting Entities maintain a reporting hotline ("**Hotline**") for employees, vendors, partners and other interested parties to anonymously report, among other things, any matters relating to suspected unethical, illegal, unsafe or other unwanted behaviors. Modern slavery and human trafficking issues are reportable on the Hotline, and the designated modern slavery sub-category ensures that any related allegations or concerns are clearly identified and flagged. The Hotline is managed by an independent third party and is accessible 24/7 by telephone or by submitting an anonymous report online. The Hotline is available in multiple languages to mitigate any language barriers and to provide information to those intending to report.

6. MEASURE OF EFFECTIVENESS

The Reporting Entities acknowledge that modern slavery and human trafficking are possible risks within our business operations and supply chain. The Working Group undertakes various steps to address these risks in their respective region across our business, including reviewing our policies and business practices to ensure they reflect our commitment to:

- implementing and utilizing effective systems and controls designed to reduce the risk of modern slavery in our business and supply chains; and
- transparency through our disclosure obligations.
- we monitor and assess the effectiveness of our modern slavery policy framework through:
- regular engagement and feedback from key stakeholders, including through active promotion of our reporting Hotline; and
- operational risk and mitigation plan reporting to the relevant boards and senior executives.

Process of Consultation

The Reporting Entities took a cross-functional approach to preparing and drafting this Statement. A consultation process was undertaken. Each Reporting Entity's board of directors was given an opportunity to consider and provide comments on the Statement.

Approval

This Statement has been prepared by the Working Group and approved by the boards of directors of Brookfield Corporation (on 13 May 2026) pursuant to section 11(4)(a) of the MSA Canada, Brookfield Asset Management (on 13 May 2026) pursuant to section 11(4)(b)(i) of the MSA Canada, the United Kingdom Reporting Entities (on 26 May 2026) and the Australian Reporting Entities (on 3 June 2026).

Additional information for Australia.

1. Australian Reporting Entities – Business and Supply Chain

a. BHCA 1 PTY LTD

Our Operations:

BHCA1 is the head entity in Australia for a substantial proportion of Brookfield Corporation's Australian assets. The Australian corporate structure has been established under BHCA1 and it is the parent holding entity of certain asset holding structures within the Australian business.

- BHCA1 consolidates entities in its financial statements that are operated by separate management teams, either through other third-party management arrangements on a contractual basis, or businesses that operate independent processes and management structures.

Our Supply Chain:

The majority of BHCA1's suppliers are Australian-based companies, providing services such as:

- Outsourcing
- Vendor Software Providers
- Data and Cloud Hosting Services
- Professional Services
- Properties and Facilities Maintenance
- Hotels and Lodging
- Building and Construction
- Corporate Services

Through the risk assessment process, building construction, cleaning and janitorial services, security and personnel safety, technology hardware providers, and building maintenance and repair services were identified as having a high-risk of modern slavery.

b. BOPA TRUST AND BSREP HOLDINGS TRUST

These entities also sit in the Brookfield Corporation group. These Australian entities do not employ employees. Relevant real estate management functions are provided to the reporting entities by an affiliate, Brookfield Properties Australia Pty Ltd (referred to as "**Brookfield Properties**"). Reference to employees made in section 1.b.i. refers to the employees of Brookfield Properties.

i. Brookfield Properties

Our Operations

Brookfield Properties manages real estate investments on behalf of Brookfield Asset Management, one of the largest alternative asset managers in the world. Our business operates across Australia, primarily in the central business districts of Sydney, Melbourne, Perth and Brisbane.

The services Brookfield Properties provides includes:

- Business and capital planning
- Asset management
- Property management
- Development management
- Design and construction
- Corporate services

As of 31 December 2025, we have 158 employees in Australia. Our workforce is comprised of 96% permanent employees, 3% max-term employees, and 1% casual employees. We do not use workers from labour hire agencies.

Based on the above, we consider that there is a low risk of modern slavery within our employing entities.

Our Supply Chain

The majority of Brookfield Properties' tier one suppliers are Australian-based companies, although we understand that some of the goods and services that they supply may originate from outside of Australia.

Main categories of suppliers used across the business are:

- Professional services firms, such as technology, legal, audit, banking, insurance and tax
- Services relating to commercial real estate including property development, repair and maintenance services, building cleaning and security
- Utilities and public services

Through the risk assessment process, categories of high-risk for modern slavery identified were building construction, cleaning and janitorial services, security and personnel safety, and building maintenance and repair services.

Our Modern Slavery Initiatives

In 2025, the following key initiatives were completed:

- Completed a portfolio-wide review of cleaning vendor contracts, including externally managed assets, to confirm alignment with Brookfield standards, including:
 - Anti-bribery, anti-corruption, and modern slavery clauses
 - A requirement for Brookfield Properties' approval prior to any subcontracting of cleaning services
- Extended our existing comprehensive modern slavery clauses to all contracts, building on their previous application to higher-risk arrangements, reinforcing a consistent and proactive approach to ethical standards.
- Achieved Cleaning Accountability Framework Standard Certification for a managed building.

In 2026, the Brookfield Properties Modern Slavery Group will build on 2025's progress with these initiatives:

- Enhance contractor compliance oversight by increasing the frequency of 'quick audits' and introducing periodic compliance attestations for higher-risk contractors and suppliers, covering key compliance, governance, and ethical requirements.

c. BROOKFIELD AUSTRALIA MANAGER HOLDINGS PTY LTD

This entity is an indirect subsidiary of Brookfield Asset Management Ltd. It represents the parent holding entity of certain asset managers within the Australian business, including Brookfield Investment Management Australia Pty Ltd, which functions as an employing entity for Brookfield's Australian investment professionals and shared services employees.

2. Assessing the Effectiveness of Actions Taken and Continuous Improvement

The Australian Reporting Entities acknowledge that modern slavery is a risk within parts of their supply chain, managed through our processes which monitor and assess the effectiveness of our modern slavery risk controls. These processes include:

- Regular engagement and feedback being provided between cross-functional departments
- Monitoring and reporting of risks to management through operational risk and board reporting frameworks
- Independent third-party reporting of any reports made to the Brookfield Ethics Hotline, which are then investigated by our Internal Audit department. Trends in reporting are assessed, including modern slavery risk (if present).

We will continue to monitor a number of indicators to assess the effectiveness of our modern slavery risk management processes. We review and enhance measurement indicators in line with continuous improvement. These include:

Number of Reported Incidents	2025	2024
Modern slavery in our operations	0	0
Modern slavery in our supply chain	1 allegation, unsubstantiated following investigation and independent review.	0
Modern slavery reported to our Hotline	0	0
In relation to the Positive Work Environment policy	0	0

Training for Modern Slavery:

In the Reporting Period, new employees received modern slavery training during the onboarding process. In addition, all staff undertook training with respect to human rights and modern slavery as part of their annual mandatory Code of Business Conduct and Ethics training requirements.

Continuous improvement initiatives within the Reporting Period included:

- Ongoing risk-based assessment of vendors with ongoing monitoring
- Implemented new vendor onboarding system, with improved review and approval workflows
- Review of cleaning vendor contracts to confirm alignment with Brookfield standards, including Anti-bribery, anti-corruption, and modern slavery clauses
- Extended our existing comprehensive modern slavery clauses to all contracts, building on their previous application to higher-risk arrangements, reinforcing a consistent and proactive approach to ethical standards.

Over the next Reporting Period, the Reporting Entities will continue:

- To regularly review and improve our supplier risk assessment processes where possible
- Ongoing monitoring and due diligence processes on suppliers
- To engage and educate stakeholders regarding the risks of modern slavery, as well as broaden this process by better understanding their approach to assessing and addressing Modern slavery
- To review actions taken in response to modern slavery risks

3. Management of Modern Slavery Risks

Our management of modern slavery risks is consistent with that described by the Australian Reporting Entities in this statement.

4. Mandatory Criteria Reference Table For MSA Australia

Australian Modern Slavery Act (Cth) Mandatory Criteria	Australian Reporting Entities Australia Statement Section Reference
Section 16(1)(a) Identify the reporting entity	Introduction Appendix I Reporting Entities
Section 16(1)(b) Describe the structure, operations and supply chains of the reporting entity	Australian Reporting Entities Business and Supply Chain Appendix III
