

TRILITY

Modern Slavery Statement

June 2021

Managing Director statement

At TRILITY, respecting human rights is inherent in our business operations and is embedded in our core values. We seek to treat everyone fairly and consistently, creating a workplace and business environment that is safe, ethical, open, transparent, and trusted.

Preventing modern slavery practices is a complex issue with a global impact and eliminating the potential for it to occur in our operations is key to our commitment. We are also committed to working with our suppliers to identify and tackle the risks of modern slavery throughout their operations and supply chains.

Our first modern slavery statement reports on the steps TRILITY has taken during the period 1 January 2020 to 31 December 2020 to address the risks associated with modern slavery.

Managing Director

Reporting entity

TRILITY's core business is delivery of water, wastewater, and environmental services. TRILITY is involved in the delivery of 100s of water infrastructure projects, currently servicing over 600 facilities. Our solutions are built on our heritage and our expertise, a dedication to do it right, and a passionate commitment to provide our services effectively, efficiently, safely, and responsibly.

We work alongside our partners in optimising their facilities, processes, and performance – creating value through the full water and wastewater cycle, enhancing their competitiveness, and protecting the environment. Our approach and design principles to water management and environmental solutions use our experience, innovation, and proven technology to develop a solution to suit each client's needs.

TRILITY plays a vital role in our modern world by providing water, wastewater and environmental solutions which contribute to a better quality of life for those communities we serve, across Australia and New Zealand. We have extensive operations, spanning from the far south of Tasmania to the most northern tip of the country and across the Tasman.

TRILITY has operated in Australia since 1993 and New Zealand since 2015. Previously known as United Utilities, we have a 25-year track record of delivering significant water infrastructure projects and successfully operating them for our clients. Some of our projects have included finance, design, construction, operations and maintenance as a complete service offering, making us a leader of DBFO / BOOT project delivery of water infrastructure.

We have designed, built and / or operate over 70 treatment plants in Australia and New Zealand with a combined capacity of 1,800 megalitres per day through our national workforce of approximately 300 people. These plants fall under 21 operating contracts incorporating DBFO, BOOT, DBO, D&C and O&M contract models. Several of these contracts have included financing of the project.

We have extensive operations, spanning from the far south of Tasmania to the most northern tip of the Australia and throughout New Zealand. Our business combines many services, solutions, products, and applications to suit each client's needs. We keep pace with rapidly evolving technology, markets, regulations, and climate conditions. Our solutions are built on our heritage and our expertise, a dedication to do it right, and a passionate commitment to provide our services effectively, efficiently, safely, and responsibly.

TRILITY is broadly a national company, with most of our operations in regional areas of Australia and New Zealand. TRILITY has offices in Adelaide (x2), Melbourne (x2), Gold Coast, NSW Central Coast, Perth, and Launceston, Mount Maunganui (x1). TRILITY also has staff permanently based at more than 40 operational locations around Australia and New Zealand.

Corporate structure and operations

In collaboration with our clients, we provide water and environmental services to 1000's of customers

- Water treatment

Our approach and analysis

For the current reporting period, TRILITY used the Global Slavery Index 2018 to identify industries and geographic regions which potentially present a higher risk of exposure to modern day slavery.

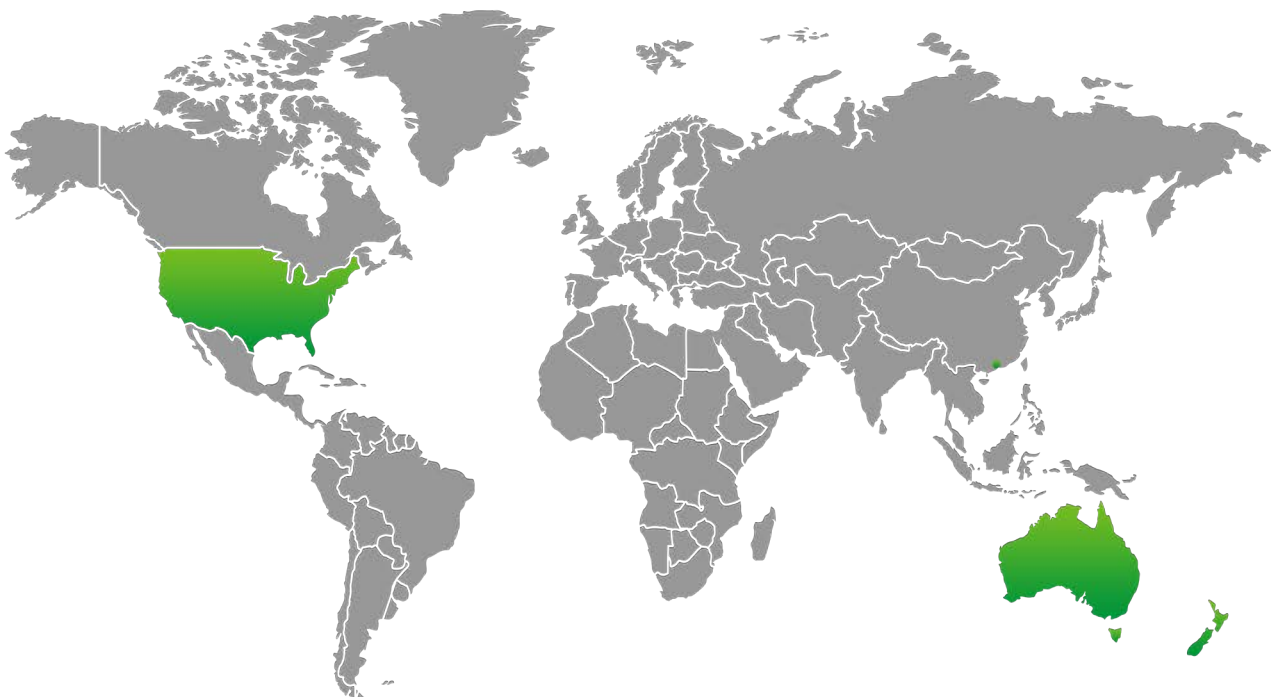

All suppliers of goods or services to TRILITY in both Australia and New Zealand during the 12 months to February 2021, regardless of value, were categorised based on their industry and location.

As a result of this analysis, it was found:

- 100% of TRILITY’s direct suppliers are based on low risk geographic regions (refer Image 1)
- 3.3% of goods purchased by TRILITY are from high risk industries (textiles and IT related equipment)

As a result of this analysis, TRILITY’s direct exposure to modern slavery risks is considered low. However, TRILITY recognises that, whilst the direct exposure may be low, indirect exposure may be different due to suppliers sourcing their products from geographic regions at higher risk. As a result, further work is required in conjunction with these suppliers to fully assess that risk (refer Actions to be taken).

Actions taken to date	Actions to be taken	Assessing effectiveness of those actions
<p>During the current reporting period TRILITY implemented the following actions:</p> <ul style="list-style-type: none"> • Developed and published the TRILITY Modern Slavery policy • Incorporated new standard form clauses into supply contracts requiring suppliers to ensure they have taken reasonable steps to address the risks of modern slavery in their respective supply chains • Provided high level training in modern slavery terms, definitions and obligations to the TRILITY executive team • Commenced a review and assessment of training material suitable for all TRILITY employees in relation to modern slavery 	<p>During the next reporting period, TRILITY commits to assessing and implementing, where practical, the following actions:</p> <ul style="list-style-type: none"> • TRILITY’s high risk supplier assessment to be amended to include suitable questions regarding modern slavery risks in their respective supply chains • Incorporate appropriate modern slavery risk awareness elements into TRILITY’s employee induction training • Develop and implement information and training sessions for key work groups across the business (e.g. procurement teams) to identify and report modern slavery risks, and possible breaches • Assess modern slavery risks in related entities which do not currently trigger the revenue threshold for reporting 	<p>Assessing the effectiveness of TRILITY’s approach to managing the risks of modern slavery is an ongoing exercise which is achieved using the same continual improvement methods embedded in TRILITY’s ISO certified integrated management system including:</p> <ul style="list-style-type: none"> • Establishing and measuring appropriate key performance indicators (e.g. training completion) • The periodic management review of TRILITY’s integrated management system, including assessment of the effectiveness of all procurement processes • Internal audits

Approval

This modern slavery statement was approved by the board of TRILITY Group Pty Ltd on 24 June 2021. The boards of other entities listed on page 4 have adopted this modern slavery statement for their operations.

Our corporate values

The TRILITY brand is the symbol of our heritage and of the quality and trust we have delivered for more than 25 years. To our clients, it embodies a commitment to anticipate and meet their changing needs. To our organisation, it represents the imagination we use to address those needs in a manner that reflects our values.

TRIsafe

Be safe because you want to,
not because you have to

What is expected from TRILITY today?

It is to provide an excellent service provision to our clients now and in the future in a safe, sustainable and environmentally responsible way. It is to continuously strengthen our commitment to being the 'partner of choice' when it comes to service delivery.

TRILITY will continue to act decisively to address what matters most today and tomorrow; apply expertise and resources to deliver beyond the expected outcome; ensure a clear focus on innovation and integrity; and invest in continually improving.

Thank you
for your interest in TRILITY
