

Modern Slavery

STATEMENT 2020

This Modern Slavery Statement (**Statement**) is made in accordance with the *Modern Slavery Act 2018* (Cth) (**Act**) and submitted as a joint statement on behalf of the reporting entities outlined in Appendix One (collectively the **Nutrien Reporting Entities**). The Statement applies to, and outlines the steps taken, by the Nutrien Reporting Entities and their owned or controlled entities (collectively, **Nutrien Ag Solutions**) for the period of 1 January 2020 to 31 December 2020 (**Reporting Period**), to assess and address modern slavery risks in their operations and supply chains. References to "we", "us" or "our" in this Statement refers to Nutrien Ag Solutions, unless stated otherwise.

APPENDIX ONE – NUTRIEN REPORTING ENTITIES	14
APPENDIX TWO - MANDATORY CRITERIA	17

1. INTRODUCTION

At Nutrien, we recognise that Modern Slavery can occur in many forms, including slavery, indentured servitude, human trafficking, forced marriage, forced labour, debt bondage, child labour, and deceptive recruiting for labour or services (**Modern Slavery**). We understand that the private sector, along with other stakeholders, plays a key role in the fight against modern slavery and that the Act encourages businesses to assess and address Modern Slavery risks in their operations and supply chain.

The purpose of this statement is to outline our approach to ensuring we have robust frameworks and processes in place to minimise the risk of Modern Slavery in our operations and supply chains.

We are committed to identifying Modern Slavery risks and addressing those risks.

In addition, Nutrien is committed to respecting and observing all human rights, in accordance with applicable law and the principles set forth in international standards, including the Voluntary Principles on Security and Human Rights and the core conventions of the International Labour Organisation and the United Nations (**UN**), such as the UN's Declaration of Human Rights, the UN's Declaration on the Rights of Indigenous Peoples, and the UN's Guiding Principles on Business and Human Rights.

Nutrien promotes integrity, teamwork and professionalism across all our operations and partnerships, and is guided by the following principles:

- Support the physical safety and health, psychological safety and mental wellbeing of our employees
- Actively strive to minimise our environmental footprint, including waste and emissions
- Complying with all applicable employment and human rights laws in any jurisdiction where we do business and promoting respect for the rights, culture, diversity and dignity of all individuals
- Being an active and contributing member of each community in which we do business and create long-term, mutually beneficial relationships with our communities

2. GROUP STRUCTURE, OPERATIONS AND SUPPLY CHAIN

Group Structure

The Nutrien Reporting Entities are Australian subsidiaries of Nutrien Ltd. (TSX & NYSE: NTR) (**Nutrien**). Based in Canada and formed following the 2018 merger of Agrium Inc and the Potash Corporation of Saskatchewan Inc., Nutrien is a global provider of crop nutrients, inputs and services. Nutrien is a diversified and integrated company operating potash, phosphate and nitrogen facilities predominantly in North America and Canada and has a strong distribution network of over 2000 retail outlets located across North America, Australia and Latin America.

Nutrien’s Australian business, which includes the Nutrien Reporting Entities, has been servicing the Australian agricultural industry for generations. This historical experience has made us experts in a range of different farming areas, including precision farming services, marketing livestock and wool, agricultural services, water, finance, insurance, merchandise and real estate.

In October 2019, Nutrien acquired Ruralco Holdings Limited, a diversified agricultural company, and rebranded its Australian business as Nutrien Ag Solutions. As a result of the acquisition, Nutrien Ag Solutions now has a network of 290 corporate-owned stores, more than 300 independent rural supplies retailers, a proud network of joint ventures and partnerships and a suite of other businesses.

Nutrien also has a number of non-controlling investments in key Australian agricultural businesses, including 50% interests in:

AuctionsPlus Pty Ltd

A market leader in providing online services for the buying and selling of livestock and wool via on-line auctions;

AWH Pty Ltd

A leading Australian wool and independent cotton handler and one of Australia’s leading general warehouse and specialist logistics providers; and

Nutrien Harcourts Pty Ltd

Is a leading provider of real estate services in regional and rural Australia, through a franchised network of real estate agencies.

OUR BRANDS

Operations

Appendix One lists the Nutrien Reporting Entities and provides an overview of their structure and operations. These entities function as an integrated rural agribusiness operating in all states and territories of Australia and, collectively, they provide customers with complete agriculture solutions including nutrients, crop protection products, seed, precision agricultural digital tools, water irrigation systems, agronomic and farm planning advisory services, wool-broking services, livestock and rural real estate agency services, and also insurance broking services and financial products.

What we do

Farm Inputs

We develop and manufacture our proprietary crop protection, plant nutrition and animal health products here in Australia. With facilities in Kwinana (Western Australia) and Dandenong (Victoria), we are proudly investing in Australian jobs and infrastructure to ensure farmers have certainty of supply and quality. We also work with our key suppliers to source a wide range of inputs from seed and fertiliser to animal health products and fencing to provide the solution to every farming challenge.

Wool & livestock

Every year, Nutrien Ag Solutions helps facilitate the sale of around 400,000 bales of wool, 3 million cattle and 13 million sheep, which in turn helps feed and clothe communities right across the world.

DIGITAL AG

We are investing more than \$50 million into online platforms to give farmers an efficient and reliable way to access products and information via smart devices, at any time and from anywhere.

Professional Services

With the backing of a strong, global balance sheet, we can support Australian agriculture in times of need and in times of prosperity, through our industry-focused insurance products, finance options and real estate services.

Water and Irrigation

Water is vital in farming and we support some of Australia's largest irrigation projects with advice, planning and construction, including almond farms in Victoria and pastoral stations in Western Australia. We are also an experienced and trusted water broking firm assisting growers in managing and optimising their water assets.

We have a hand in around 40% of the food and fibre produced on Australian farms

Around 2million tonnes of fertiliser supplied to growers each year

Approximately 400,000 bales of wool sold each year

We help customers buy and sell more than \$3 billion worth of regional property every year

We have invested in 55+ fertiliser facilities in regional areas.

Around 16 million sheep and cattle sold each year on behalf of our customers

Every year, we help farmers trade more than 400,000 ML of water, vital to running their farms

We help 38,900 farmers protect their properties with insurance

Nutrien Ag Solutions employs approximately 3701¹ people across Australia. These employees work in the finance, human resources, information technology, internal audit, procurement, proprietary product research and development, legal, retail, safety and risk, strategy and corporate development, customer and business services and government and industry affairs.

Supply Chain

The Nutrien Reporting Entities procure products and services from several countries across the world. These products and services generally fall into two categories as set out below:

1. Products sourced for resale

The Nutrien Reporting Entities collectively procure a wide variety of goods for resale in their ordinary course of business operations, including from one or more of the types of goods or services listed below. The Upstream Companies (see Appendix One) procure more limited goods and services given the nature of their corporate function.

Type of goods / service	Description
Merchandise Products	Crop protection chemical products, animal health chemical products, fencing and agricultural equipment, seed
Bulk fertiliser	Acquired for retail sale to end-users
Raw materials/chemicals	Used in manufacture and formulation of animal health and agricultural health products for retail sale to end-users

2. Products and Services sourced for internal use

The Nutrien Reporting Entities also procure goods and services to support their effective operations.

Type of goods / service	Description
Office equipment / consumables	Coffee, tea, other beverages, cleaning products, office furniture, printing, stationery
Technology and IT	Electronics, tablets, laptops, desktops, mobile phones
Transport	Vehicles, communications service providers, forklifts, plant and equipment (loaders, skid steers, headers etc.)
Contractors / third parties	Independent agents/ contractors engaged to provide the following services to customers on behalf of Nutrien Ag Solutions including livestock and real estate agency, wool broking and storage and handling, insurance, agronomic advice, seed cleaning and coating, seed and fertiliser spreading
Professional services	Auditors, tax consultants, legal advisors, environmental consultants, safety advisors, workers compensation advisors, architects, fire engineers, building surveyors
Facilities management	Cleaning, security, premises
Utilities	Power, water, gas

¹ Figures up to date as of 31 July 2021.

3. POTENTIAL MODERN SLAVERY RISKS IN OUR OPERATIONS AND SUPPLY CHAIN

Risk Assessment

In the lead up to the publication of this statement, including during the Reporting Period, our risk assessments included (but were not limited to) the following actions:

- Consideration of the latest advice from government and key industry associations on Modern Slavery control measures.
- A focused assessment of suppliers in high-risk sectors or industries and high-risk countries and geographic locations, high-risk business models and vulnerable groups within our operations and supply chains.
- A detailed review of our recruitment, employee engagement and remuneration practices.
- Review of information lodged via our various grievance or whistle blower mechanisms and identifying any patterns that could point to Modern Slavery risks within our operations and supply chains

Potential Risks in our Operations

As a result of our risk assessment, we consider that the risk of Modern Slavery occurring within the operations of the Nutrien Reporting Entities and their owned or controlled entities to be low overall. Employees of Nutrien Ag Solutions operate in Australia only, which is considered to be a low prevalence jurisdiction for Modern Slavery risk according to the Global Slavery Index (GSI).² Our staff are provided training in Modern Slavery risks and review of remuneration practices, and award/collective bargaining agreement classifications in our human resources systems, that our staff are appropriately remunerated. Although there are subsidiaries of Agrium Asia Pacific in Latin America, they do not employ individuals and therefore, such legal entities do not affect our overall assessment of risk in respect of our personnel.

A small segment of our business employs people to assist with livestock mustering, irrigation construction and support as yard hands. These roles are typically considered to require base-skilled labour, and, in these types of circumstances, potential Modern Slavery risks may arise:

- from the recruitment of vulnerable worker groups, including migrant workers and itinerant workers including backpackers and international students;
- where employment contracts are not provided in a language in which workers can understand and/or where the worker does not have equal rights to terminate; or
- recruitment fees are charged to workers.

Many of the abovementioned potential risks may become acute where there is a reliance on labour hire for the provision of personnel. However, most of the personnel of Nutrien Ag Solutions are employed directly on a permanent or casual basis, through standard contracts of employment. These contracts of employment are administered centrally by the Nutrien Ag Solutions Human Resources Team. We also consider that the risks are mitigated by virtue of the employment processes that are detailed in section 4 below.

We recognise that there is a potential risk that Modern Slavery may exist in the operations or supply chains of companies we invest in. We have introduced Modern Slavery considerations when assessing investment opportunities. Where we invest in a company we do not control, we assess Modern Slavery risk at a broader level as part of our pre-investment due diligence. This includes requesting from the company, the processes and procedures that the company has in place to address Modern Slavery risk in its operations and supply chains. If we become aware of any material Modern Slavery risk in the company following our investment, we will appropriately address such risk with the company.

²All references in this Statement to higher risks associated with certain countries refer to the studies published by the GSI.

Potential Risks in our Supply Chain

Certain manufacturing regions and materials carry higher risk of Modern Slavery by virtue of the prevalence of Modern Slavery in particular countries. There are also risks linked to certain industries such as manufacturing and agriculture even in countries considered to have lower risks of Modern Slavery. We recognise that a large number of our direct suppliers are likely to rely on extensive global supply chains for the goods and/or services provided to us which makes it particularly challenging for us to have direct and meaningful visibility across our supply chain beyond the first tier.

1. Procurement of Goods

The Nutrien Reporting Entities recognise that their supply chains are complex and multi-jurisdictional. Potential Modern Slavery risks may arise in respect of procurement from the following categories by virtue of the industry risks and country of origin risks:

Supply of rural and general merchandise products

Merchandise goods which are procured by the Nutrien Reporting Entities as fully developed products are largely imported, particularly from China.

Proprietary ("in-house" brands)

Within Australia, Nutrien Ag Solutions has two manufacturing sites (Kwinana in Western Australia and Dandenong in Victoria) where products for our "in-house" brands are manufactured. Products for these brands are also manufactured in a number of jurisdictions. For example, during the Reporting Period, there were 471 suppliers for Loveland AgriProducts across the following countries:

Australia	China	India	New Zealand	Switzerland	United	United States
Belgium	Hong Kong	Italy	Spain	Thailand	Kingdom	of America

Within Australia, Nutrien Ag Solutions has control over the operations and working conditions in our manufacturing sites and places of business. Historically, we would periodically travel to overseas sites to inspect operations of our suppliers but due to travel bans arising from the COVID-19 pandemic, we have been unable to engage in direct oversight inspections at such overseas sites during the Reporting Period. We recognise that reduced direct oversight increases the potential for Modern Slavery risk to occur unmitigated, especially where complex supply chains are involved.

Fertiliser

A key area of Nutrien Ag Solutions' operations that presents a higher potential risk, is the fertiliser business. During the Reporting Period, Nutrien Ag Solutions sourced fertiliser from the following countries: China, Germany, Canada, Saudi Arabia, Russia, United States, South Korea, Hong Kong, Malaysia, Indonesia, Belgium, Taiwan and Singapore. Some of the above countries are associated with higher Modern Slavery risk.

Crop Protection

Nutrien Ag Solutions' crop protection suppliers are likely to source crop protection products, components and/or chemicals from overseas including from higher risk countries increasing the potential risk of Modern Slavery in our supply chain.

Fencing

Approximately 50% of products in this category are sourced from suppliers that manufacture fence products in Australia from Australian steel and timber. The remaining 50% of products are sourced from suppliers that import finished goods from around the world.

Animal Health

There are two distinct animal health product types:

- our major suppliers of Pharmaceutical type animal health products are all multinational suppliers with significant global interests and are likely to source animal health products, components and/or chemicals from overseas including from higher risk countries increasing the risk of Modern Slavery in our supply chain; and
- animal nutrition and feed type products make up approximately 40% of the animal health category. Almost all of the products supplied in this category are manufactured in Australia largely from Australian ingredients. Many of the suppliers are small regional businesses supplying stores locally.

Seed

Many of Nutrien Ag Solutions' seed suppliers are Australian based companies with Australian based seed production. There are, however, some multi-national companies that supply to Nutrien Ag Solutions and may have seed breeding and production operations in higher risk countries that increase the risk of Modern Slavery in our supply chain.

2. Procurement of Services

Our risk assessment has demonstrated that Modern Slavery risks may arise in respect of procurement from the following services:

Cleaning

Cleaning has been identified as a higher risk industry for a number of factors, including but not limited to, the higher proportions of vulnerable workers in the industry and because these services are often performed by sub-contractors in complex arrangements. In 2020, the engagement of cleaning services increased as result of COVID19. We recognise that this may have increased our exposure to Modern Slavery risks in our supply chain.

Labour hire

The risks of Modern Slavery rising from labour hire in the Australian agricultural sector have been publicised in recent years. There have been reports in the media of lower skilled workers placed via labour hire agencies on farms and construction sites where workers were found to have been working in conditions akin to Modern Slavery. However, this is not considered a risk for our own operations, given the Nutrien Reporting Entities only supply goods and services to participants in the agricultural sector, and is not a primary producer itself.

IT

The Nutrien Reporting Entities identified 63 suppliers of goods and services related to IT-related goods and services, 47 of which have off-shore operations. In relation to IT products such as laptops and smart phone batteries, there are known risks associated with the mining and production of minerals such as cobalt and lithium that have been associated with high risk mining practices and human rights issues. There has also been risk reported in connection with the manufacture of some technology hardware. However, such risks are common to any company that uses these goods and services regardless of their industry or geographic location.

Shipping and logistics

Transportation of goods inbound. Modern Slavery risks have been highlighted in recent years in relation to the shipping industry in particular. We conduct appropriate supplier due diligence, including for example for shipping companies that deal with fertiliser imports.

4. ADDRESSING POTENTIAL MODERN SLAVERY RISKS IN OUR OPERATIONS AND SUPPLY CHAIN

Throughout the Reporting Period, and in the leadup to the publication of this Statement, the Nutrien Reporting Entities have taken several key actions to address the potential risk of Modern Slavery in our operations and supply chain:

- engaged external advisors to implement a cloud-based platform allowing us to focus on core Modern Slavery risks and collaborate with suppliers and other stakeholders;
- designed a questionnaire to enable us to better assess our suppliers for Modern Slavery risk; and
- engaged independent consultants to review aspects of our operations and supply chain, such as our payroll systems and awards/enterprise agreements to identify and remedy any underpayment risks.

In our Operations

The Nutrien Reporting Entities have a number of controls and processes in place to assess and address the risk of occurrences of Modern Slavery. The measures described in this section 4 are applicable to the Nutrien Reporting Entities and our owned or controlled entities.

1. Governance and Policies

The Nutrien Ag Solutions Corporate Risk and Compliance Committee (now known as the Integrity Committee), was established to assist Nutrien Ag Solutions management to identify and manage risk, compliance obligations and related issues. The Integrity Committee reports directly to the Nutrien Ag Solutions National Leadership Team. The Integrity Committee is multi-disciplinary, with members drawn from each key business unit and function, including safety and risk, human resources, finance, internal audit, IT, procurement, fertiliser, and legal. The Committee has played a role in considering the Modern Slavery risks in each key area of our supply chain. It has also served as a forum for implementing new Modern Slavery initiatives such as the third party platform (further described below).

In addition, all Nutrien Ag Solutions employees are bound by the global Nutrien Code of Conduct, which is publicly available [here](#). The Nutrien Code of Conduct requires that all employees fulfil their ethical responsibilities by:

- Committing to the public and our stakeholders our uncompromising integrity in every aspect of our efforts
- Describing how we will do business the right way and our fundamental respect for the rule of law
- Guiding employees on how to engage in decision making that demonstrates and sustains our commitment to integrity in all our operations around the world
- Outlining how our commitment supports our stakeholders – employees, customers, suppliers, competitors, governments, communities, and shareholders
- Explaining how other entity-level policies connect with our Code of Conduct

2. Training and Capacity Building

Training on the Code of Conduct is compulsory for all employees of Nutrien and its affiliates, world-wide, including the Nutrien Reporting Entities and their owned or controlled entities. Each employee must complete the training as part of their induction and on boarding process and again on an annual basis. The Code of Conduct training is conducted via an online training module and is interactive with questions to ensure that the employee completing the training demonstrates an understanding and comprehension of the training material. Employees receive other training relating to the Code of Conduct over the course of the year, some of which is in person or via webinars.

3. Reporting Mechanisms

Nutrien has a global, independent Integrity Helpline that employees can use (including on an anonymous basis, if so desired) to report to Nutrien's Integrity Group any concerns regarding a breach of the Code of Conduct or legal requirements. The Nutrien Ag Solutions Whistle-blower Policy, which applies to the Nutrien Reporting Entities and their owned or controlled entities, provides information to eligible whistle-blowers and employees of Nutrien Ag Solutions about the types of disclosures that constitute 'protected disclosures' under Australian whistle-blower laws and encourages people to report unethical or illegal behaviour without fear of retaliation.

We take all reports very seriously. As mentioned above, these reporting channels are monitored closely by the Integrity Group. If, hypothetically, we found through an investigation that our business had caused or contributed to Modern Slavery, we would seek to remediate the impact by implementing an appropriate corrective action plan.

4. Employee Recruitment and Remuneration

The Nutrien Reporting Entities have processes in place to ensure compliance with applicable workplace relations laws and regulations. Our recruitment processes ensure that all recruitment is consistent and fair and in accordance with Nutrien's values of diversity and inclusion. Checks are undertaken during the recruitment process to verify age and rights to work.

In our Supply Chain

1. Supplier Due Diligence Processes

Currently, all Nutrien Ag Solutions overseas bulk fertiliser suppliers are required to undergo an enhanced due diligence analysis utilising the Dow Jones Risk & Compliance program and financial stability checks. Outside of this requirement, all divisions of the business are expected to follow a risk-based approach when deciding what type of due diligence to conduct on a supplier, based on factors including the type of goods or services, supplier reputation and supplier country of origin.

Nutrien's Integrity Group is currently working with other functions, such as Procurement, to enhance Nutrien's supplier due diligence process and tools that will improve consistency and completeness across our suppliers of products and goods and services.

2. Supplier Code of Ethics

Our Supplier Code of Ethics outlines the standards of behaviour expected of our suppliers. If a supplier fails to comply with the Supplier Code of Ethics, or if a supplier is not committed to improving its practices to ensure compliance with the Supplier Code of Ethics, then Nutrien Ag Solutions will review its relationship with that supplier. This review may result in remedial steps being taken by Nutrien, with consequences up to and including the immediate termination of our relationship with that supplier.

The Supplier Code of Ethics expressly deals with Modern Slavery. Each supplier must ensure, for example, that all components utilised in its supplied goods and materials do not contain metals derived from minerals or derivatives originated from conflict regions that directly or indirectly finance or benefit armed groups and cause or foster human rights abuses, and are acquired legally and meet legally regulated use requirements.

We expect all suppliers of goods and/or services to every Nutrien entity world-wide to comply with the Supplier Code of Ethics and we endeavour to include this expectation in supplier contracts. Each supplier must also comply with all applicable laws, regulations, and contracts that relate to the goods or services it supplies to Nutrien, and promptly report any violations to Nutrien.

Relevantly, suppliers must:

- not directly or indirectly participate in any form of forced or compulsory labour;
- not require workers to surrender, as a condition of employment, any government-issued identification, passports, work permits or any other documents necessary for free movement and termination of employment;
- allow workers to leave work and freely terminate their employment (taking into account legal notice period requirements); and
- not directly or indirectly participate in any form of human trafficking.

3. Supplier Questionnaire

During the Reporting Period, Nutrien Ag Solutions engaged external consultants to assist with developing our Modern Slavery compliance program. Following this consultation, Nutrien Ag Solutions has taken steps to develop a third party platform to monitor and assess steps taken by the key suppliers of goods and services to Nutrien Ag Solutions.

Given the large number of suppliers of goods and services to Nutrien Ag Solutions, a risk-based approach was taken to prioritise suppliers considered higher risk based upon criteria including: the geographic location of the supplier's operations, the nature of the goods or services supplied by the supplier, and the annual spend of Nutrien Ag Solutions on the goods or services supplied by the supplier.

During the second reporting period, the suppliers assessed as higher risk will be provided with a link to a Modern Slavery questionnaire on the third party platform. Completed questionnaire responses will be used to inform future procurement decisions and to identify where further due diligence or remediation measures are needed.

4. Procurement Contracts

Our procurement teams already work hand in hand with members of our Legal department and the Integrity Group to ensure that our contracts appropriately manage supply chain risk. We are working to include clauses expressly requiring supplier compliance with Modern Slavery and Anti-Bribery/Anti Corruptions laws and Nutrien's Supplier Code of Ethics in all of our template contracts and purchase terms, to the extent they are not already included. Further, our Legal department supports our endeavours to have these requirements included in executed supplier contracts wherever possible.

5. ASSESSING THE EFFECTIVENESS OF OUR ACTIONS

Nutrien Ag Solutions will continue to explore key performance indicators (KPIs) that will help track the effectiveness of its actions to prevent and address the risk of Modern Slavery in our operations and supply chains. In future years, we will continue to gather, collate and act where appropriate, based on the information provided by our suppliers via questionnaires completed using the third party platform.

Going forward, Nutrien Ag Solutions will also measure effectiveness by the level of engagement with suppliers and tracking the completion of the actions set out in the following section "Going forward". The Integrity Committee, which includes representatives from various business units and functions will review the effectiveness of our Modern Slavery controls. As part of continuous improvement, Nutrien Ag Solutions will regularly review and update controls that will impact on Modern Slavery related risks.

6. GOING FORWARD

As part of its commitment towards continuous improvement, Nutrien Reporting Entities will continue to develop and improve procedures, requirements and risk assessment and monitoring frameworks that address issues of Modern Slavery. Further integration of the Ruralco Holdings Limited business will bring opportunities to further streamline and improve our focus on our core values of Safety and Integrity and embedding these core values into the way we conduct business in Australia.

Over the course of 2021, our aim is to:

- increase awareness of Modern Slavery risks, particularly within the Procurement and Fertiliser Teams, and Nutrien Ag Solutions employees who are more likely to engage with suppliers from 'higher risk' geographies and sectors;
- continue to engage with our suppliers to better understand their supply chain risk, which is a complex and multi-jurisdictional issue;
- undertake a further review of our standard form contracts and documents to ensure that there are appropriate inclusions to further assist us with mitigating and managing Modern Slavery risks in our supply chains; and
- complete the implementation of the third party platform and send questionnaires to key suppliers.

7. CONSULTATION AND APPROVAL

In order to prepare this Statement, we engaged with each of the Nutrien Reporting Entities and consulted with personnel in key divisions of the Nutrien Ag Solutions business.

This Statement has been reviewed, considered and approved by each director of the Nutrien Reporting Entities.

This Statement was approved by the principal governing bodies of Agrium Australia Pty Ltd and Agrium SP Holdings Pty Ltd on behalf of each of the Nutrien Reporting Entities and signed by Robert Clayton, Director of Agrium Australia Pty Ltd and Agrium SP Holdings Pty Ltd.

Signed by:

Robert Clayton

Director

APPENDIX ONE – NUTRIEN REPORTING ENTITIES

Reporting Entities

Overview

Upstream Companies

Agrium Australia Pty Ltd
ACN 100 419 314
("Agrium Australia")

Agrium Australia is wholly owned by Nutrien. Its sole asset is its ownership in Ruralco. There are no other operations apart from this asset ownership. Agrium Australia has no employees.

Agrium SP Holdings Pty Ltd
ACN 146 674 400
("Agrium Holdings")

Similar to Agrium Australia, Agrium Holdings is wholly owned by Nutrien and is a vehicle for holding intra Nutrien finances. It does not have employees.

Agrium SP Investment Pty Limited
ACN 146 676 388
("Agrium Investment")

Agrium Investment is wholly owned by Agrium Holdings. It has a facility with a European subsidiary. It does not have employees.

Agrium South Pacific Pty Limited
ACN 146 679 610
("Agrium South Pacific")

Agrium South Pacific is wholly owned by Agrium Investment and was set up as the vehicle to purchase Agrium Asia Pacific. It does not have employees.

Agrium Asia Pacific Limited
ACN 081 890 459
("Agrium Asia Pacific")

Agrium Asia Pacific is wholly owned by Agrium South Pacific. It employs some of the Australian employees. During the Reporting Period, Agrium Asia Pacific:

- held 1.1% interests in a Brazilian holding company;
- was trustee for the distribution of funds relating to the repayment of funds from a foreign entity;
- owned investment vehicles domiciled in South America relating to operations in Brazil. It is administered by Nutrien in Canada. These vehicles do not have supply chains or staff in South America;
- held minority interests in a grains processing company in Shenzhen, China. Apart from receiving dividends, Agrium Asia Pacific does not take a role in the operations of this entity; and
- held 50% interests in a bulk fertiliser joint venture that was not operational during the Reporting Period and is in the process of being wound up.

Downstream Companies

Nutrien Ag Solutions Limited
ACN 008 743 217

Nutrien Ag Solutions Limited is wholly owned by Agrium Asia Pacific. Nutrien Ag Solutions Limited wholly owns a number of subsidiaries that conduct the operations of the global Nutrien Limited group under the Nutrien Ag Solutions banner with various sub-brands.

During the Reporting Period, Nutrien Ag Solutions Limited's owned or controlled entities::

- held New Zealand product registrations;
- held 50% interests in a joint venture in wool storage and handling;
- was a franchisor of a business in rural and regional property; and
- managed the import, storage and handling of bulk fertiliser from the United States.

Ruralco Holdings Limited
ACN 009 660 879
("Ruralco")

Ruralco is wholly owned by Agrium Australia. It is a holding company of a number of subsidiary companies that conduct the operations of the Australian Nutrien business together with the subsidiaries of Nutrien Ag Solutions Limited. During the Reporting Period, Ruralco's owned or controlled entities operated in the following industries:

- Rural merchandise
- Water merchandise
- Agronomy services
- Livestock and wool agency
- Live exports ³
- Specialist rural water brokerage
- Water exchange
- Agent providing financial on behalf a bank
- Water merchandise and irrigation
- Wool storage and handling
- Investments in agricultural technology
- Insurance brokerage ⁴
- Grain accumulation ⁵

Platinum Operations Pty Ltd
ACN 140 741 153 ("Platinum")

Platinum is a controlled subsidiary of Ruralco. It does not own or control other entities. Platinum is located in South Australia and has approximately 68 employees. Platinum's industries include: retail merchandise business, sales of crop protection products, livestock and agronomy services and firearm supplies. Platinum does not manufacture any goods, but rather, sources all of its merchandise through the same channels as Nutrien Ag Solutions and Ruralco.

Roberts Limited
ACN 009 475 647 ("Roberts")

Roberts is a wholly owned subsidiary of Ruralco. During the Reporting Period, Roberts operated an agricultural services business in Tasmania with retail rural merchandise outlets and real estate offices. Roberts and its subsidiaries sold general merchandise and rural suppliers and provides the following services: Agronomy, Finance, Insurance, Real estate agency services, Livestock agency services, Wool agency services and Irrigation. Roberts does not manufacture any goods, but rather, sources all its merchandise through the same channels as Nutrien Ag Solutions and Ruralco.

³ Interests in the entity operating in this sector were sold on 31 December 2020 and live exports no longer forms part of our business.

⁴ Ruralco holds minority interests in the entity operating in this sector.

⁵ The entity operating in this sector ceased operations in June 2020.

Downstream Companies

Combined Rural Traders Pty Ltd
ACN 000 838 899
 ("CRT")

CRT is a wholly owned subsidiary of Ruralco. It holds interests in two subsidiaries and runs rural retailers with over 300 independent stores across Australia. CRT originated in New South Wales, operates nationally and has approximately 5 employees.

The CRT business model is based upon independent members (**CRT Members**) operating a retail business under the CRT banner. CRT does not manufacture its own products. It wholesales finished products to the CRT Members, including those within the core brands. CRT does not manufacture any goods, but rather, sources all its merchandise through the same channels as Nutrien Ag Solutions and Ruralco.

CRT's industries include: water and irrigation, general merchandise, crop protection, animal systems and agricultural commodity risk management advisory and market intelligence.

Total Eden Pty Ltd
ACN 148 941 226
 ("Total Eden")

Total Eden is a wholly owned subsidiary of Ruralco. It owns four subsidiaries operating in the irrigation, construction and water merchandise sector under the Nutrien Water brand. Total Eden has approximately 236 employees. Goods provided include pumps, water and irrigation merchandise. Total Eden manufactures products, but the majority of those products are engineering to order and not manufactured for mass production. All other merchandise is sourced through the same channels as Nutrien Ag Solutions and Ruralco. Services provided include: water reticulation repairs and maintenance, bore installation and development, pump replacements, reticulation system repairs and maintenance and design.

APPENDIX TWO - MANDATORY CRITERIA

Mandatory Criteria	Page number/s
a) Identify the reporting entity	1
b) Describe the reporting entity's structure, operations and supply chains.	4 -6
c) Describe the risks of modern slavery practices in the operations and supply chains of the reporting entity and any entities it owns or controls.	7 - 10
d) Describe the actions taken by the reporting entity and any entities it owns or controls to assess and address these risks, including due diligence and remediation processes.	11 -14
e) Describe how the reporting entity assesses the effectiveness of these actions.	14
f) Describe the process of consultation on the development of the statement with any entities the reporting entity owns or controls (a joint statement must also describe consultation with the entity covered by the statement).	15

Modern Slavery

S T A T E M E N T

2 0 2 0
