IV. Risks of Modern Slavery

Mort & Co acknowledges that it operates within the agricultural sector which is generally recognised as containing an elevated risk of modern slavery practices, in particular:

- Sector Risks – the agriculture and livestock processing sectors have been identified as having a potentially elevated risk of modern slavery practices due to the labour practices associated with those sectors;
- Products and Services Risks – products such as livestock and commodities, and services such as livestock processing and logistics and transport, have been identified as having a potential link to modern slavery practices based on their location and/or labour practices; and
- Geographic Risks – commodities and shipping services have been identified as having a potential risk of modern slavery practices based on the jurisdiction in which they are procured from/provided in.

As per previous Modern Slavery Statements, Mort & Co remains of the view that the above risks within its operations are low based on indicators such as regulated and audited labour practices, the location of its operations and regulations placed on suppliers in sourcing their products.
